

Spot Trace

Advanced Asset Protection Solutions

Location | Motion Detection | Location History | Customization

Spot is a rugged solution that offers advanced tracking for remote assets in extreme and harsh environments. Built on Globalstar's next generation Simplex data network, the Spot system is built to handle mission critical data with near real time reporting

- Plug n Play setup
- Receive SMS/email/voice alerts on events
- 1 year of tracking and event data
- Rechargeable batteries and external power
- Motion / Vibration activation
- Internal Antenna
- <2.5 m location accuracy
- Communication over Globalstar Simplex network
- 50 channel GPS
- Operation altitude from -100 m to 6500 m
- Extreme operating range from -40C to 85C.
- Water and dust proof.
- Dimensions (L x W x H) 6.83 cm x 5.13 cm x 2.14 cm

How it works ?

The Spot unit uses GPS signals to determine position. The position / motion data is sent to Globalstar satellite and thereon to a ground station and finally to the CloudM gateway server. From there the data is pushed to client system, browser, Email, SMS or Voice.

Continuous security
