

# WorkTrack

Built for Field Services Businesses

Tour Monitoring | Proof of Presence | Employee Security | Real Time Reporting | GPS

WorkTrack is a tour monitoring and proof of presence solution based on battery-less NFC radio tags, Android cell phone software and a web based Control Room. The system is easy to use and has a very low ongoing operational cost. Take control with WorkTrack !

- Supports staff and administrators profiles.
- Supervisors can check staff status on cell phone.
- Help button messages out to entire team.
- Extensive reporting on site access, tour times by team member, date or by customer site.
- Secure tag creation software.
- Ability to reassign tags.
- GPS tracking.
- Login and Logout times.
- Exception Reporting
- No training required.
- Custom Modules

**“Real time operational efficiency and ability to quickly react to fluid field conditions can be economically achieved by WorkTrack” – Joseph F, Canada**

**“Tagged checkpoints and real time updates ensure that both customer property and our staff is secure” – Michael G, Australia**

**Weather proof check point tags.**

**CLOUDM**  
IoT - Cloud Computing - M2M
